This letter is for people with a learning disability

Earlier this year, lots of people had their COVID-19 vaccinations to keep them safe from COVID-19 infection

People with a learning disability are now being offered a booster vaccination.

A booster is just like having a third dose of the COVID-19 vaccine and will keep you safe for longer

If you are over 18 years old, you can have a booster vaccine **3 months after** you had the second dose of COVID-19 vaccine.

To get your booster vaccination, you or someone who helps you can:

book an appointment on the National Booking Service

[Book or manage a booster dose of the coronavirus (COVID-19) vaccine - NHS (www.nhs.uk)](www.nhs.uk)

Or there are some vaccination centres where you can turn up without an appointment

[Find a walk-in coronavirus (COVID-19) vaccination site - NHS (www.nhs.uk)](www.nhs.uk)

<u>Or</u> you can ask your GP if they can give you a vaccination at the doctor's surgery

You may have your booster vaccination somewhere different to where you had your first and second doses

This winter, you can also get the flu vaccination which will keep you safe from flu. To get a flu vaccination, you should talk to your GP

It is safe to have the COVID-19 and flu vaccinations at the same time.

There is an Easy Read leaflet about COVID-19 boosters here:

[Easy read guide to the COVID-19 booster vaccination (publishing.service.gov.uk)](publishing.service.gov.uk)
