Early Intervention Vehicle

and help reduce unnecessary hospital admissions

We aim to see housebound patients at home within two hours and prevent hospital admissions. Every vehicle is crewed by an Urgent Care Practitioner and a member of the social team.

What we can do

- Clinical assessment with medications
- Care for falls without injury or with minor wounds
- Support with poor mobility (stuck in chair or bed) and mobility aids
- Support for Carers/Family who are struggling to cope
- Emergency care packages
- Onward referral to other Prevention of Admission teams

What we can't see

- Acutely unwell or injury needing hospital assessment, chest pain and difficulty in breathing
- Stroke symptoms•
- Fall involving hitting head and on blood thinners
- Acute mental health crisis
- Loss of consciousness
